Which app should I use?

Our pick of player apps for each device, so you don't have to guess.

Any app that supports "Xtream Codes" works. These are the ones our customers find easiest.

Our picks

- **Fire TV Stick, Nvidia Shield, Android TV boxes (for example Xiaomi):** TiviMate, IPTV Smarters Pro or XCIPTV. See TiviMate.
- **Apple TV, iPhone, iPad:** iMPlayer or IPTV Smarters Pro from the App Store. See iMPlayer .
- **LG TVs:** IPTV Smarters Pro where your TV's app store has it, or use a Fire TV Stick (easiest).
- **Samsung TVs:** see the section below.
- **Android phones and tablets:** IPTV Smarters Pro or XCIPTV from the Play Store.

> **Tip** Not sure? Pick IPTV Smarters Pro. It's on nearly every device and works the same everywhere, except Samsung TVs.

Samsung smart TVs

We don't support Samsung TVs (they run a system called Tizen).

- The Samsung version of IPTV Smarters is blocked for security reasons, so you won't be able to log in with it.
- You can try **IBO Player** if it's in your TV's app store.
- For the best results, plug a streaming box into your TV, such as a Fire TV Stick, Nvidia Shield or an Android box like Xiaomi, and use TiviMate on it.

> **Tip** A dedicated streaming box is almost always more reliable than an app running on the TV itself.

Next step

Follow the guide for your app to type in your login: What are XC details?
